

Giuseppe Cocconi – A bibliography

Towards the end of August 2008, Giuseppe Cocconi entrusted to CERN Library (in the person of Tullio Basaglia) his own collection of papers. These include papers, written by him and/or Vanna Tongiorgi (his wife), alone or together with other people. Mostly in the form of reprints, the papers are properly bound in eight volumes plus one folder. They are ordered chronologically and numbered.

This bibliography is mainly based on that collection. We have included other documents, like Internal reports, Minutes, Lectures, as recorded in various databases (CDS, SPIRES, INSPEC) and elsewhere. The chronological order is maintained; the number n inscribed in the original collection, is reported as (Cn) at the end of a reference, after the year.

(Last update on June 14, 2009)
